

USER GUIDE

HR Handbook

Your complete guide to managing staff attendance, payroll, and personnel records through the BCF Staff Portal.

DOCUMENT	VERSION	ISSUE DATE	FOR
BCF-UG-HR-001	1.0	May 2026	HR

Quick Reference

The most common actions for HRs at a glance

Approve Attendance

1. Go to Attendance → filter Pending
2. Review entries
3. Click Approve or Bulk Approve

Manual Entry

1. Go to Attendance → Manual Entry
2. Select staff, date, times
3. Submit (auto-approved)

Generate Payroll

1. Go to Payroll
2. Click Generate Run
3. Enter period dates → Generate

Export Attendance

1. Go to Attendance
2. Set filters (date, status)
3. Click Export CSV

View Staff Profile

1. Go to Staff in HR section
2. Click a staff member's name
3. View profile, history, balance

Reset Password

1. Open staff profile
2. Click Reset Password
3. Copy temp password & share securely

1 Your HR Dashboard

What you see as an HR user

When you log in, your Dashboard shows your own status (clock-in widget, upcoming jobs, leave balance). You also have access to HR-specific sections in the navigation: **Staff**, **Payroll**, and full **Attendance** management.

Staff Management

View all staff profiles, employment details, hourly rates, and account statuses.

All Attendance

See clock-in records for every staff member — approve, reject, add manual entries, and export.

Payroll

Generate pay runs, review individual payslips, add deductions, and approve.

Leave (view only)

View all staff leave requests and their statuses. HR cannot approve leave — only Admin/Manager.

2 Attendance Management

Reviewing and approving staff time entries

2.1 Approving Time Entries

Daily review is recommended to keep payroll data accurate.

- 1 Go to **Attendance** in the HR section of the left navigation.
- 2 Set the **Status** filter to **Pending** to show only entries awaiting review.
- 3 Review each entry — check clock-in time, clock-out time, and total hours.
- 4 Click **Approve** on correct entries, or use **Bulk Approve** to approve multiple at once.
- 5 Click **Reject** and enter a reason if an entry is incorrect. The staff member will be notified.

Only APPROVED entries are included in payroll calculations. Entries left as Pending will not be paid until approved.

2.2 Rejecting an Entry

- 1 Click the **Reject** button on the entry.
- 2 Enter a reason (e.g. "Clock-in time appears incorrect — please verify").
- 3 Click **Confirm Reject**. The staff member is notified and the entry is flagged.

After rejecting an entry, you or the manager may need to add a corrected manual entry if the staff member was legitimately working.

2.3 Adding a Manual Time Entry

Use this when a staff member forgot to clock in/out, had a system issue, or was on site without a device.

- 1 Go to **Attendance** and click the **"Manual Entry"** button.
- 2 Select one or more staff members from the list.
- 3 Enter the **date**, **clock-in time**, and **clock-out time**.
- 4 Add a **note** explaining why the manual entry is being added.
- 5 Click **Submit**. The entry is created with **Approved** status automatically.

Each staff member can only have one time entry per date. If an entry already exists, it will be skipped — check first before adding.

2.4 Exporting Attendance Data (CSV)

- 1 Go to **Attendance**.
- 2 Apply any filters — date range, staff member, or status.
- 3 Click **"Export CSV"**. The file downloads immediately.

The CSV includes: Employee ID, Name, Date, Clock In, Clock Out, Total Hours, Break Minutes, OT flag, Source, Status, Notes.

3 Staff Management

Viewing and updating staff records

3.1 Viewing a Staff Profile

- 1 Go to **Staff** in the Human Resources section of the left navigation.
- 2 Click a staff member's name or row to open their profile.
- 3 The profile shows: personal details, role, employee ID, hourly rates, leave entitlement, contact info, and tabs for attendance, jobs, and leave history.

3.2 Updating Staff Information

- 1 From the staff profile, click **"Edit Profile"**.
- 2 Update any fields: name, contact details, hourly rates (regular and overtime), or annual leave entitlement.
- 3 Click **Save**. Changes take effect immediately for future payroll runs.

Changes to hourly rates affect future payroll calculations only. Previously approved payslips are not recalculated.

3.3 Resetting a Staff Password

- 1 Open the staff member's profile.
- 2 Click the **"Reset Password"** button.
- 3 A new temporary password is generated and displayed on your screen.
- 4 **Copy the temporary password immediately** — it will not be shown again.
- 5 Share it with the staff member privately (in person or direct message). They must change it on first login.

Never share temporary passwords through public group chats or unsecured channels.

4 Payroll Management

Generating, reviewing, and approving pay runs

4.1 Generating a Payroll Run

- 1 Go to **Payroll** in the Human Resources section of the navigation.
- 2 Click "**Generate Run**".
- 3 Set the **Period From** and **Period To** dates.
- 4 Click **Generate**. A draft payslip is created for every active non-admin staff member with approved entries in that period.

Ensure all attendance entries for the period are **APPROVED** before generating. Pending entries are excluded from calculations.

4.2 Hour Calculation Rules

Shift Type	Regular Hours	Overtime Hours
Standard shift (no OT)	Up to 8h per day	Hours beyond 8h
OT-type shift (approved OT)	0h	All hours
RDOT-type shift (rest day)	0h	All hours

4.3 Reviewing a Payslip

- 1 Click on any payslip from the Payroll list to open it.
- 2 Review: period dates, regular hours, overtime hours, and gross pay.
- 3 Check that the hourly rates match the staff member's current rates.
- 4 Add deductions if required (see 4.4), then approve.

4.4 Adding Deductions

- 1 On a draft payslip, scroll to the **Deductions** section.
- 2 Click "**+ Add Deduction**". Enter a description and amount.
- 3 Net Pay updates automatically. Add as many deductions as needed.
- 4 Click "**Save Deductions**".

4.5 Approving a Payslip

- 1 On a reviewed draft payslip, click **"Approve Payslip"**.
- 2 The payslip is locked — status changes to **Approved**.
- 3 The staff member can now view their approved payslip under **My Payslip**.

Approved payslips are permanently locked and cannot be edited. Verify all figures before approving.

5 Frequently Asked Questions

Q A staff member's payslip shows wrong hours. What do I do?

A If the payslip is still in Draft, you can delete it and regenerate after correcting the attendance entries. If already Approved, contact the System Administrator — locked payslips cannot be edited through the portal.

Q Can HR approve leave requests?

A No — leave approval is restricted to Admin and Manager roles. HR can view all leave requests but cannot approve or reject them.

Q Why is a staff member missing from the payroll run?

A They may have no approved attendance entries in that period, or their account may be marked inactive. Check their profile and attendance records.

Q How do I handle a duplicate time entry?

A Only one entry per staff member per date is allowed. If a duplicate exists, reject the incorrect one and keep the accurate one.

Q Can I export payroll data?

A Yes — from the Attendance page, use "Export CSV" for time-based data. For payroll-specific exports, use the Export CSV button on the Payroll page.
