ISSUE DATE

May 2026

FOR

Manager

Quick Reference

The most common actions for Managers at a glance

Create a Job

1. Go to Live Board
2. Navigate to the date
3. Click Add Job, fill details, save

Approve Attendance

1. Go to Attendance → filter Pending
2. Review, then Approve or Bulk Approve

Approve Leave

1. Go to Leave → filter Pending
2. Review request, click Approve or Reject

Generate Payroll

1. Go to Payroll
2. Click Generate Run
3. Enter period dates → Generate

Add Staff Member

1. Go to Staff
2. Click New Staff Member
3. Fill details → Save

View Reports

1. Go to Reports in Admin section
2. Select report type and filters

1

Admin Dashboard

Your daily management overview

The Admin Dashboard gives you a high-level view of all operations. Unlike staff dashboards, yours shows company-wide stats:

Today's Jobs

Total number of jobs scheduled today across all sites and projects.

Clocked-In Staff

Live count and list of who is currently clocked in, with their status, duration, and role.

Pending Leave

Number of leave requests awaiting your decision.

Pending OT

Number of overtime requests awaiting approval.

Today's Job List

Card view of every scheduled job today with status, project, van, and staff count.

Weekly Chart

Jobs this week grouped by status (scheduled/in progress/completed) across Mon–Sun.

The clocked-in staff list updates in real time via WebSocket — you don't need to refresh the page to see new clock-ins.

2

Live Board

Day-by-day job scheduling and monitoring

2.1 Navigating the Live Board

The Live Board is your command centre for daily scheduling. Each date shows a grid of all jobs — from a single focused view.

1

Go to **Live Board** in the Operations section of the left navigation.

2

Use the ← → **arrows** to move between dates, or use the **date picker** for any specific day.

3

Click "**Today**" to jump back to the current date.

4

Summary stats at the top show: total jobs, in-progress count, staff deployed, and staff clocked in for that day.

2.2 Creating a Job

- 1 On the Live Board, navigate to the target date and click **"Add Job"**.
- 2 Enter the **Job Title** (required).
- 3 Select a **Project/Site** to link this job to a client project (optional but recommended).
- 4 Set the **Date**, **Start Time**, and **End Time**.
- 5 Assign a **Van** if transport is required.
- 6 Select **Crew Members** from the staff list. Assigned staff receive an automatic notification.
- 7 Optionally link to a **BCF Order** or **BGR Project stage**.
- 8 Click **Create Job**. The job appears on the board with status **Scheduled**.

If any assigned staff has approved leave on that date, a warning banner will appear. Review the leave calendar before confirming the assignment.

2.3 Editing a Job

- 1 Click the **pencil icon**  on any job card.
- 2 Update any field — title, date, times, van, crew, or client links.
- 3 Click **Save Changes**. Newly assigned staff are notified automatically.

2.4 Job Status Management

Action	From	To	Who
► Start Job	Scheduled	In Progress	Assigned staff, Site Head, Manager, Admin
✓ Complete	In Progress	Completed	Assigned staff, Site Head, Manager, Admin
× Cancel	Scheduled	Cancelled	Manager, Admin
↶ Re-open	Completed	In Progress	Manager, Admin
↶ Restore	Cancelled	Scheduled	Manager, Admin

3 All Jobs List

Viewing jobs across all dates

Period Tabs

Toggle between Upcoming, Past, and All jobs at the top of the page.

Filters

Filter by status or date range for precise results.

Date Groups

Jobs are grouped under date headings. Today and Tomorrow are highlighted.

Board Link

Each job row has a calendar icon — click it to jump directly to that day on the Live Board.

4 Staff Management

Creating and managing staff accounts

4.1 Creating a New Staff Account

- 1 Go to **Staff** in the Management section.
- 2 Click "**New Staff Member**".
- 3 Fill in: **Full Name**, **Email**, **Role**, **Employee ID**, **Hourly Rate** (regular and overtime), and **Annual Leave Entitlement** (default: 28 days).
- 4 Click **Create**. A temporary password is generated and displayed — **copy and share it securely** with the staff member.
- 5 The staff member logs in with the temporary password and is prompted to create a new one.

4.2 Updating Staff Details

Open a staff profile → click **Edit Profile**. You can update name, email, role, rates, entitlement, and contact details. Click **Save**.

4.3 Resetting a Password

- 1 Open the staff profile → click "**Reset Password**".
- 2 Copy the temporary password displayed. **It will not be shown again.**
- 3 Share it privately. The staff member must change it on next login.

4.4 Assigning Roles

Role	Access Level	When to assign
Admin	Full system access including Audit Log and Businesses	System owner / lead administrator
Manager	All ops: jobs, staff, payroll, attendance, leave, OT	Operations managers and team leads
HR	Attendance, payroll, staff records	Human resources / payroll staff
Site Head	Manage site jobs, scan QR codes	Senior on-site workers
Staff	Own attendance, jobs, leave, payslip	All other employees

5 Attendance Management

Approving Entries

- 1 Go to **Attendance**. Filter by **Status: Pending**.
- 2 Review the clock-in time, clock-out time, and total hours for each entry.
- 3 Click **Approve** individually, or use **Bulk Approve** to select and approve many at once.

Manual Entry

- 1 Click "**Manual Entry**". Select staff, enter date and times, add a note, and submit.
- 2 Manual entries by managers are auto-approved and count immediately towards payroll.

Only one entry per staff member per date is allowed. If an entry already exists for that date, it will be skipped.

6 Leave & Overtime Management

Approving Leave Requests

- 1 Go to **Leave**. Filter by **Pending** to see requests awaiting decision.
- 2 Review dates, leave type, duration, and any note from the staff member.
- 3 Check for scheduling conflicts — if the staff member is on a job, a warning is shown.
- 4 Click **Approve** or **Reject** (rejection requires a reason). The staff member is notified.

Approving Overtime Requests

- 1 Go to **Overtime**. Review pending requests.
- 2 Approve or decline. On approval, the staff member's Dashboard will show the OT clock-in toggle for that date.

OT

Overtime on a normal working day — approved hours are paid at the overtime rate.

RDOT

All hours on a rest day are overtime, regardless of duration.

7 Payroll

Generating a Run

- 1 Go to **Payroll** → click "**Generate Run**".
- 2 Set Period From and To dates. Click **Generate**.
- 3 Draft payslips are created for all active non-admin staff with approved entries in the period.

All attendance entries for the period must be **APPROVED** before generating payroll. Pending entries are excluded.

Reviewing & Approving

- 1 Open a draft payslip. Review regular hours, overtime hours, and gross pay.
- 2 Add deductions if required (click + Add Deduction, enter description and amount).
- 3 Click **Approve Payslip** when correct. Status locks to **Approved** — the staff member can now view it.

Approved payslips cannot be edited. Double-check all figures before approving.

Payroll Export

Click "**Export CSV**" on the Payroll page to download payroll data. Apply period/status filters first. The export includes: Employee ID, Name, Regular Hours, OT Hours, Gross Pay, Deductions, Net Pay, Approved By.

8

Projects, Vans & Reports

Projects

Create Project

Go to Projects → New Project. Enter name, client, business (BCF/BGR), status, and assign site heads.

Checklist

Jobs linked to a project auto-create checklist items. Completing a job auto-ticks the item.

Status Lifecycle

Planning → Active → On Hold → Completed.
Update from the project detail page.

Client Links

BCF orders: completing a linked job auto-marks the BCF stage as Done. BGR stages are tracked for reporting.

Vans

Go to **Vans** in Management to add vehicles, track MOT/service dates, and manage allocations to staff. Deactivate a van to remove it from job assignment dropdowns.

Reports & Audit

Go to **Reports** in Admin to view hours summaries, attendance patterns, and payroll totals. **Audit Log** (Admin only) shows a full timestamped trail of all significant actions — payslip approvals, password resets, rejections, etc.

9

Frequently Asked Questions

Q A staff member's approved payslip has an error. What do I do?

A Approved payslips are locked through the portal. Contact the System Administrator — only they can make corrections at the database level. Document the issue and the correct figures.

Q I need to add attendance for someone who was on site without a device.

A Go to Attendance → Manual Entry. Select the staff member, enter the correct date and times, and add a note. Manual entries by managers are auto-approved.

Q A staff member is assigned to a job but they're on approved leave that day.

A The portal will show a warning when you save the job. You should either reassign the job to another staff member, or decline their leave request if the work is critical.

Q How do I move a job to a different date?

A Open the job on the Live Board and click Edit. Change the date field and save. The job will appear on the new date instead.

Q Can I see who is on-site right now?

A Yes — your Admin Dashboard shows a real-time list of all clocked-in staff with their status, duration, and role. It updates live without needing a page refresh.

Q A staff member completed a job by mistake. Can I undo it?

A Yes — open the job on the Live Board or in All Jobs, and click "↶ Re-open" to set it back to In Progress. Only Manager and Admin can re-open completed jobs.
