FOR

Site Head

Quick Reference

The most common actions for Site Heads at a glance

Scan Staff QR

1. Go to "QR Scanner" in Field menu
2. Allow camera access
3. Point at staff QR code — auto-confirms

Start a Job

1. Open My Jobs → Site Jobs
2. Find the job, press ► Start
3. Status changes to In Progress

Complete a Job

1. Find the In Progress job
2. Press ✓ Complete
3. Checklist item auto-updates

Clock In

1. Go to Dashboard or Attendance
2. Press "Clock In"

Request Leave

1. Go to "Leave" in the menu
2. Click "New Request" and submit

View Payslip

1. Go to "My Payslip" in the menu
2. Select a pay period to view

1 Your Role as Site Head

What you can access and manage

As a Site Head, you have all the standard staff functions *plus* the ability to manage jobs on your assigned project sites and scan staff QR codes for clock-in/out.

Site Jobs

View and manage all jobs linked to projects you've been assigned to as site head.

QR Scanner

Scan staff QR codes on site to clock them in or out without needing their device.

Job Status

Start and complete jobs on your projects. Cannot create or delete jobs.

Your Own Time

Clock in/out, request leave, view payslip — same as standard staff.

2 Site Jobs

Managing jobs on your assigned projects

Viewing Site Jobs

Go to **My Jobs** (or "Site Jobs") in the left navigation. You'll see all jobs linked to projects where you've been assigned as site head — not just jobs assigned directly to you.

Upcoming

Jobs from today forward, sorted by soonest first.

Past

Completed or cancelled jobs from previous dates.

Filter

Filter by status (Scheduled / In Progress / Completed) or custom date range.

Calendar

Use the Live Board link on each job row to jump to that day's full board.

Starting a Job

- 1 Find the job in **Site Jobs** — it will show status **Scheduled**.
- 2 Press the "► **Start**" button on the job row.
- 3 Status changes to **In Progress**. Your manager sees this update in real time on the Live Board.

Completing a Job

- 1 When the work is done, find the job with status **In Progress**.

- 2 Press the "**✓ Complete**" button.
- 3 The job is marked **Completed**. The linked project checklist item is automatically ticked.
- 4 If the job was linked to a BCF order stage, that stage is automatically marked as done in the BCF system.

You cannot create, edit, or delete jobs — only start and complete them. For any scheduling changes, contact your manager.

3 QR Scanner

Clocking staff in and out on site

The QR Scanner lets you use your device's camera to scan a staff member's QR code, recording their clock-in or clock-out instantly without them needing access to their own device.

How to Scan

- 1 Go to **QR Scanner** in the **Field** section of the left navigation.
- 2 When prompted, tap **Allow** to grant camera access.
- 3 Point the camera at the staff member's QR code. Hold steady — the scan happens in 1–2 seconds.
- 4 A confirmation shows the staff member's name and whether they've been clocked **in** or **out**.
- 5 The record is saved automatically. The staff member does not need to do anything.

Scan Behaviour

Staff state before scan	Result after scan
Not clocked in	Clock-In recorded — shift starts from scan time
Currently clocked in	Clock-Out recorded — shift ends at scan time
On break	Break is ended, then Clock-Out is recorded

QR scanning requires an internet connection. If offline, note the arrival/departure time and add it as a manual attendance entry when you're back online.

Ask staff to keep a screenshot of their QR code in their phone's camera roll so it's always available even without opening the portal.

4 Your Own Attendance, Leave & Payslip

As a site head, you also have all the same personal features as standard staff:

Clock In/Out

Use the Dashboard or Attendance page to record your own shifts and breaks.

Leave Requests

Submit annual leave, sick leave, or other absence requests under Leave in the menu.

Overtime

My Payslip

BCF Staff Portal · User Guide · Page 5 of 6 · INTERNAL

Request OT or RDOT approval before working extra hours.

View your pay breakdown for each period under My Payslip.

My QR Code

View and download your own QR code under My QR Code.

Attendance Log

View your full clock-in history and entry statuses under Attendance.

Frequently Asked Questions

Q Why can't I see some jobs in Site Jobs?

A You only see jobs linked to projects where you've been assigned as site head. If a project is missing, ask your manager to assign you to it.

Q I scanned a QR code but nothing happened.

A Check your internet connection. Also make sure the QR code is clear and well-lit. If the issue persists, manually note the time and ask a manager to add the entry.

Q Can I create or delete a job?

A No — site heads can only start and complete jobs. Creating, editing, and deleting jobs is reserved for Managers and Admins.

Q A staff member's QR code won't scan.

A The code may be damaged or too small on screen. Ask the staff member to zoom in or increase their screen brightness. If it still fails, contact a manager for a manual clock-in entry.

Q I completed a job by mistake. Can it be undone?

A Contact your manager — they can re-open the job and set it back to In Progress.
