1

Introduction & Purpose

This Standard Operating Procedure (SOP) document defines the standardised procedures, roles, and responsibilities governing the use of the **BCF Staff Portal** — the central digital platform for Bespoke Garden Rooms Ballycastle's workforce management operations.

The portal facilitates attendance tracking, job scheduling, leave and overtime management, payroll processing, vehicle allocation, and client project integration. All staff and management are required to follow the procedures outlined in this document.

Mandatory Compliance: Adherence to the procedures in this SOP is mandatory for all staff members. Failure to follow these procedures may result in inaccurate payroll, attendance discrepancies, or disciplinary action.

2

Scope & Application

This SOP applies to:

- All active employees of Bespoke Garden Rooms Ballycastle
- Contractors and subcontractors who have been granted portal access
- All operations conducted through the BCF Staff Portal at <https://staff.bespokegardenroomsballycastle.co.uk>

This document covers the procedures effective from **May 2026** and must be reviewed annually or following significant system changes.

3 Definitions & Glossary

Portal	The BCF Staff Portal web application accessible at https://staff.bespokegardenroomsballycastle.co.uk
Clock-In	The act of recording the start of a work shift within the portal
Clock-Out	The act of recording the end of a work shift within the portal
Time Entry	A single clock-in/clock-out record associated with one shift
OT (Overtime)	Hours worked beyond the standard shift on a normal working day, pre-approved by a manager
RDOT	Rest Day Overtime — all hours worked on a scheduled day off or public holiday
Payroll Run	A manager-generated calculation of gross pay for all staff for a defined pay period
Payslip	An individual pay record showing hours, gross pay, deductions, and net pay
Job	A discrete unit of work scheduled on a specific date, assigned to one or more staff members
Live Board	The day-by-day job scheduling view available to Admin and Managers
Project	A client engagement consisting of one or more jobs and a progress checklist
Site Head	A senior staff member responsible for managing jobs on assigned project sites
BCF	Bespoke Custom Furniture — a related business whose orders are integrated into the portal
BGR	Bespoke Garden Rooms — the primary business whose projects are integrated into the portal
QR Code	A unique machine-readable code assigned to each staff member for contactless clock-in
Pending	Status of a time entry or request awaiting manager review and approval
Approved	Status of an entry confirmed by a manager; included in payroll calculations
Rejected	Status of an entry declined by a manager with a reason provided

4 Roles & Responsibilities

The portal operates on a role-based access model. Each user is assigned exactly one role that determines which features they can access and which actions they can perform.

Administrator

- Full access to all portal features
- Create and manage all staff accounts, assign roles, set hourly rates
- Generate, review, and approve payroll runs
- Manage all jobs, projects, vans, businesses, and system settings
- View audit log and all reports
- Cannot delete their own account

Manager

- All attendance, leave, overtime, and job management capabilities
- Create and edit jobs on the Live Board, assign staff and vans
- Approve/reject attendance entries, leave requests, and OT requests
- Generate and approve payroll runs; add deductions to payslips
- View staff profiles and manage van allocations
- Cannot access Businesses or Audit Log (Admin only)

HR

- View all staff attendance records and approve/reject time entries
- View all leave requests; no approval rights
- Generate and manage payroll runs
- View and update staff profiles and hourly rates
- Cannot create/edit jobs or manage projects and vans

Site Head

- View and manage jobs on projects they are assigned to
- Start and complete jobs; cannot create or delete jobs
- Scan staff QR codes to clock in/out on-site
- Clock in/out for their own shifts
- Request leave and overtime

#16A34A

- Clock in and out for their own shifts; take breaks

- View their own assigned jobs and update status (start/complete)
- Submit leave requests and overtime requests
- View own attendance history and payslip
- Access their personal QR code

5 System Access & Security

5.1 Logging In

- 1 Open a browser and navigate to **<https://staff.bespokegardenroomsballycastle.co.uk>**
- 2 Enter your registered **email address** and **password**.
- 3 Click **Log In**. You will be directed to your Dashboard.
- 4 **First login only:** If you have been issued a temporary password by your manager, you will be prompted to create a new password before continuing.

5.2 Password Requirements

- Minimum 8 characters
- Must include at least one uppercase letter, one number, and one special character
- Do not share your password with any other person
- Change your password immediately if you believe it has been compromised

5.3 Password Reset

Staff cannot self-reset passwords. If you are unable to log in, contact your **line manager or HR** who will issue a temporary password via the portal. You will be required to change it on first login.

Security Notice: Never use the same password across multiple systems. Log out of the portal whenever you finish your session, particularly on shared devices.

5.4 Session & Inactivity

Sessions expire after **120 minutes of inactivity**. You will be redirected to the login page. Any unsaved form data will be lost.

6 Attendance Management

Procedures for recording, managing, and approving staff work time

6.1 Clock-In Procedure

Applies to: All staff | **When:** At the start of each working shift

- 1 Log in to the portal and go to the **Dashboard** or **Attendance** page from the left navigation.
- 2 Press the "**Clock In**" button.
If you have an approved OT or RDOT request for today, a modal will appear asking you to select the clock-in type (Regular / OT / RDOT).
- 3 Your clock-in is recorded. A live timer will begin counting your hours.
- 4 Your status changes to **Working**. This is visible to your manager in real time.

Important: You may only have one active clock-in at a time. If you forget to clock in, do not create a duplicate entry — contact your manager for a manual entry.

6.2 Clock-Out Procedure

Applies to: All staff | **When:** At the end of each working shift

- 1 Return to the **Dashboard** or **Attendance** page.
- 2 Press the "**Clock Out**" button.
- 3 The system calculates your total hours (minus break time) and closes the time entry.
- 4 For standard staff, the entry is set to **Pending** awaiting manager approval. Admin and Manager clock-outs are auto-approved.

6.3 Break & Lunch Procedure

Applies to: All staff | **When:** During a clocked-in shift

- 1 While clocked in, press **"Take Break"** or **"Lunch Break"**.
- 2 Your status changes to **On Break** or **On Lunch**. The work timer pauses.
- 3 When you return, press **"End Break"**. Break duration is recorded and automatically deducted from your total hours.

Break durations are included in your time entry record and are visible to managers when reviewing attendance for payroll.

6.4 Overtime Clock-In

Applies to: All staff with an approved OT/RDOT request | **Pre-condition:** OT request must be approved before the shift date

- 1 On the date of your approved OT/RDOT shift, go to the Dashboard.
- 2 Press **"Clock In"**. A selection modal will appear.
- 3 Select **OT** (standard overtime on a working day) or **RDOT** (rest day overtime).
- 4 Clock in. All hours on an OT/RDOT shift are recorded as overtime hours in payroll.

6.5 Attendance Entry Approval (Managers & HR)

Applies to: Admin, Manager, HR | **Frequency:** Daily review recommended

- 1 Go to **Attendance** in the left navigation.
- 2 Filter by **Status: Pending** to view entries awaiting approval.
- 3 Review each entry — check clock-in time, clock-out time, total hours, and any notes.
- 4 Click **Approve** to accept the entry (it will be included in payroll). Use **Bulk Approve** to approve multiple entries at once.
- 5 Click **Reject** and enter a reason if the entry is incorrect. The staff member will be notified.

Payroll dependency: Only APPROVED time entries are included in payroll calculations. Entries left in Pending status will not be paid until approved.

6.6 Manual Time Entry (Managers & HR)

Use when: A staff member forgot to clock in, had a system issue, or was on site without portal access

- 1 Go to **Attendance** and click "**Manual Entry**".
- 2 Select one or more staff members, enter the date, clock-in time, and clock-out time.
- 3 Add a note explaining the reason for the manual entry.
- 4 Click **Submit**. The entry is created with **Approved** status (manual entries by managers are auto-approved).

Each staff member may only have one time entry per date. If an entry already exists for that date, it will be skipped. Check existing entries before adding a manual one.

7

Job Management

Procedures for scheduling, assigning, and tracking work jobs

7.1 Creating a Job (Admin / Manager / Site Head)

- 1
- Go to **Live Board** (Admin/Manager) or **My Jobs** (Site Head) and navigate to the target date.
- 2
- Click **"Add Job"**. A modal form appears.
- 3
- Enter the **Job Title** (required), select a **Project/Site** (optional), set the **Date**, **Start Time**, and **End Time**.
- 4
- Select a **Van** if transport is required.
- 5
- Assign **Crew members** by checking staff names. Assigned staff receive a notification.
- 6
- Optionally link the job to a **BCF Order** or **BGR Project stage**.
- 7
- Click **Create Job**. The job appears on the board with status **Scheduled**.

If any assigned staff member has approved leave on the job date, a warning will appear. Consider re-assigning before confirming.

7.2 Assigning Staff to a Job

Staff may be assigned during job creation or by editing an existing job.

- Open the job on the Live Board and click **Edit (pencil icon)**
- In the Crew section, check or uncheck staff members
- Newly added staff receive an in-app notification
- Site heads can only assign staff to jobs within their assigned projects

7.3 Job Status Updates

From Status	Action	To Status	Who Can Perform
Scheduled	▶ Start Job	In Progress	Assigned staff, Site Head, Manager, Admin
Scheduled	× Cancel	Cancelled	Site Head, Manager, Admin
In Progress	✓ Complete	Completed	Assigned staff, Site Head, Manager, Admin

From Status	Action	To Status	Who Can Perform
Completed	↔ Re-open	In Progress	Manager, Admin only
Cancelled	↔ Restore	Scheduled	Manager, Admin only

7.4 BCF / BGR Client Integration

Jobs can be linked to external client platform stages during creation or editing.

- **BCF Orders:** Select an order and stage from the BCF panel in the job form. When the job is marked **Completed**, the linked BCF stage is automatically updated to **Done**.
- **BGR Projects:** Select a project and stage/substage from the BGR panel. The link is tracked for reporting but does not auto-update the external system.

8 Leave Management

8.1 Submitting a Leave Request (All Staff)

- 1 Go to **Leave** in the left navigation.
- 2 Click "**New Request**".
- 3 Select the **Leave Type** (Annual, Sick, Compassionate, Other), start date, and end date.
- 4 The system calculates the number of working days automatically.
- 5 Add an optional note, then click **Submit**.
- 6 Your manager is notified. Your request shows as **Pending** until a decision is made.

Check your leave balance on the Dashboard before submitting. Annual leave requests that exceed your remaining entitlement may be declined.

8.2 Leave Approval Process (Admin & Manager)

- 1 Go to **Leave** and filter by **Pending**.
- 2 Review the request dates, type, and any notes from the staff member.
- 3 Check the schedule for conflicts — if the staff member is assigned to a job on those dates, a conflict warning is shown.
- 4 Click **Approve** or **Reject**. A rejection requires a reason.
- 5 The staff member receives an in-app notification of the decision.

8.3 Leave Types & Entitlements

Type	Deducts Entitlement?	Notes
Annual Leave	Yes	Default entitlement: 28 days per year (set per staff member)
Sick Leave	No	Does not reduce annual entitlement

Type	Deducts Entitlement?	Notes
Compassionate	No	Bereavement or family emergency — granted at manager discretion
Other	Varies	Agreed individually between staff and manager

9 Overtime Requests

9.1 Submitting an Overtime Request (All Staff)

- 1 Go to **Overtime** in the left navigation.
- 2 Click "**New Request**". Select the date, OT type (OT or RDOT), and add an optional note.
- 3 Submit. Your manager is notified. The request shows as **Pending**.

9.2 Overtime Approval (Admin & Manager)

- 1 Go to **Overtime** and review pending requests.
- 2 Approve or decline. On approval, the staff member's Dashboard for that date will show the OT clock-in option.

OT vs RDOT: OT applies when hours exceed the regular shift on a normal working day. All hours on the overtime shift count as OT hours in payroll. RDOT applies when a staff member works on their scheduled day off — all hours are counted as overtime hours regardless of duration.

10 Payroll Processing

Procedures for generating, reviewing, and approving pay runs

10.1 Generating a Payroll Run (Admin / Manager / HR)

- 1 Go to **Payroll** in the Admin or Human Resources section of the navigation.
- 2 Click "**Generate Run**".
- 3 Enter the **Period From** and **Period To** dates. Click **Generate**.
- 4 The system creates a draft payslip for every active, non-admin staff member with approved time entries in that period.
- 5 Draft payslips appear in the Payroll list with status **Draft**.

Pre-condition: Ensure all relevant attendance entries for the period are APPROVED before generating payroll. Pending entries will be excluded from the calculation.

10.2 Hour Calculation Rules

Shift Type	Regular Hours	Overtime Hours
Standard shift (no OT)	Up to 8h per day	Hours beyond 8h
OT-type shift (approved)	0h	All hours
RDOT-type shift (approved)	0h	All hours

10.3 Reviewing & Approving a Payslip

- 1 Click on a draft payslip from the Payroll list to open it.
- 2 Review: pay period, regular hours, overtime hours, gross pay calculation.
- 3 Add any **deductions** (see 10.4) if required.
- 4 If the payslip is correct, click "**Approve Payslip**". The status changes to **Approved**.
- 5 The staff member can now view their approved payslip under **My Payslip**.

Locked on approval: Once a payslip is approved it is permanently locked and cannot be edited. Verify all figures carefully before approving.

10.4 Deductions

Deductions can be added to any **draft** payslip before approval.

- 1 Open the draft payslip and scroll to the **Deductions** section.
- 2 Click **" + Add Deduction "**. Enter a description (e.g. "Advance repayment") and the amount.
- 3 Net Pay updates automatically as deductions are added.
- 4 Click **"Save Deductions"**. Then proceed to approve.

10.5 Payroll Export (CSV)

- 1 Go to **Payroll** and click **"Export CSV"**.
- 2 Filter by period or status if required, then download. The CSV includes: Employee ID, Name, Regular Hours, OT Hours, Gross Pay, Deductions, Net Pay, Approved By.

11 Staff Management

Applies to Admin and Manager roles

11.1 Creating a Staff Account

- 1 Go to **Staff** in the Management section.
- 2 Click **"New Staff Member"**. Enter: full name, email, role, employee ID, hourly rate (regular and overtime), and annual leave entitlement.
- 3 The system generates a temporary password. **Record it securely** and share it with the staff member privately.
- 4 The staff member logs in with the temporary password and is prompted to create a new one.

11.2 Updating Staff Details

Open the staff member's profile from the Staff list. Click **Edit Profile**. You can update: name, contact details, role, hourly rates, annual leave entitlement, and emergency contact. Click **Save**.

11.3 Resetting a Staff Password

- 1 Go to the staff member's profile.
- 2 Click **"Reset Password"**. A new temporary password is generated and displayed on screen.
- 3 **Copy and securely share** the temporary password with the staff member. It will not be shown again.
- 4 The staff member is required to change the password on their next login.

Never send a temporary password via public channels (e.g. social media, group chat). Use a private, direct message or in-person communication.

11.4 Deactivating a Staff Account

Deactivating prevents login but preserves all historical data (attendance, payslips, jobs). On the staff profile, toggle the **Active** status to inactive. Deactivated staff are excluded from payroll generation.

12 Project Management

12.1 Creating a Project

- 1 Go to **Projects** in the Management section.
- 2 Click "**New Project**". Enter: project name, client/customer, business (BCF or BGR), status, and assigned site heads.
- 3 The project is created and appears on the project board.

12.2 Project Checklist & Job Linking

- Every job linked to a project automatically creates a checklist item on that project
- When the job is marked **Completed**, its checklist item is automatically ticked
- Additional checklist items can be added manually from the project detail page

12.3 Project Status Lifecycle

Projects move through: **Planning** → **Active** → **On Hold** → **Completed**. Status can be updated manually from the project detail page. Only Admin and Manager can change project status.

13 Vehicle (Van) Management

Applies to Admin and Manager roles

13.1 Fleet Management

Go to **Vans** in the Management section to view and manage the vehicle fleet.

- Add new vehicles with registration, make, model, year, MOT expiry, and service dates
- Deactivate a van to exclude it from job assignment dropdowns
- Vehicles with overdue MOT or service dates are flagged with a warning indicator

13.2 Van Allocations

- 1 From the Vans page, select a vehicle and click "**Allocate**".
- 2 Select the staff member and the allocation dates (start and end).
- 3 The allocation is recorded and the van can also be assigned to specific jobs.

14 QR Code System

14.1 Accessing Your QR Code (All Staff)

- 1 Go to **My QR Code** in the Operations section of the navigation.
- 2 Your unique QR code is displayed. Each staff member has a permanent, unique code tied to their account.
- 3 Download or screenshot the QR code to keep it on your phone for easy access on site.

14.2 Scanning Staff QR Codes (Site Head & Admin)

- 1 Go to **QR Scanner** in the Field section of the navigation.
- 2 Allow browser camera access when prompted.
- 3 Point the camera at a staff member's QR code. Hold steady for 1–2 seconds.
- 4 The system displays a confirmation with the staff member's name and clock-in/out action. The record is saved automatically.

QR scanning requires an internet connection. If the connection is unavailable, note the time manually and enter it as a manual attendance record once connected.

15

Reporting & Audit

15.1 Reports

Accessible by Admin and Manager via **Reports** in the Admin section. Available reports include: weekly/monthly hours by staff member, attendance patterns, payroll totals per period, and job completion rates.

15.2 Audit Log

Accessible by **Admin only** via **Audit Log** in the Admin section. The audit log records: user, action taken, target record, and timestamp. All significant actions (payslip approvals, password resets, attendance rejections, etc.) are automatically logged. Audit records cannot be edited or deleted.

15.3 Attendance Export

Managers and HR can export attendance data as a CSV from the **Attendance** page using the **Export CSV** button. Apply date range and status filters before exporting to narrow the dataset.

16

Non-Compliance & Exceptions

Scenario	Correct Action	Responsible
Staff forgot to clock in	Manager adds manual time entry	Manager / HR
Staff forgot to clock out	Manager updates entry with correct clock-out time	Manager / HR
Incorrect hours on approved entry	Reject the entry, correct via manual entry, contact Admin if payslip already approved	Manager
Staff unable to log in	Manager or HR resets password via staff profile	Manager / HR
Payslip approved in error	Contact Admin — approved payslips cannot be edited through the portal	Admin only
OT not pre-approved but worked	Submit a retrospective OT request; Manager approves and adjusts attendance entry	Staff + Manager
Leave conflict with scheduled job	Manager reassigns job before approving leave, or declines leave	Manager
QR scan fails on site	Note time manually; Site Head/Manager adds manual entry on return	Site Head / Manager
